## **DETAILED ACTION**

### ***Priority***

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Canada on 9/23/02. It is noted, however, that applicant has not filed a certified copy of the Canadian application as required by 35 U.S.C. 119(b).

### ***Allowable Subject Matter***

2. Claims 1-6 and 8-11 are allowed.
3. The following is an examiner's statement of reasons for allowance: The closest prior art teaches the invention essentially as claimed but does not quantify the preheating temperature, bonding pressure or heat treatment conditions. It is noted that 17 kg/mm<sup>2</sup> is about 24000 psi. The closest prior art teaching pressures teaches much lower pressures, typically about 7000 psi (Rudd, USPN 3591757) or 0.105 kg/mm<sup>2</sup> (Harmsen, USPN 3998682 and Berg, USPN 3060563).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Vinegar et al. (USPN 7156176 B2, production of hydrocarbon for fuel but not burned as the heating means for welding, no quantitative temperatures or pressures).
